

***Bubs Token  
Whitepaper***

***DOGE is a lie!***

***SHIB is a waste!***

***FLOKI is a joke!***

***BABYDOGE is a failure!***

***The people have been lied to!***

***The only dog token worth your time and effort is  
BUBS.***

## **About the Project**

***BUBS token is an exciting new future for dog tokens. We are an elite group of representatives of dog tokens across several continents. Collaborative efforts have led to the creation of BUBS, the only true dog token. For years the public has been misled about dog tokens, their utility and the value they bring to the world. We are working hard to build a serious, pet-centered project allowing users to immortalize pets on the blockchain.***

## Roadmap

*The first phase is focused on developing a visible media presence for BUBS. We are aiming to be listed on multiple exchanges, CoinMarketCap and CoinGecko.*

*The second phase is focused on community engagement and building a following for BUBS. It's only a matter of time until people realize the only true dog token is BUBS.*

*The third phase will be focused on research and development, as we develop new ways to innovate the economic application of BUBS. We are considering an NFT microchip that will allow people to identify their pet on the blockchain.*

## **Tokenomics**

***Binance Smart Chain network***

***Source code verified***

***Ownership renounced***

***Total Supply:***

***420,690,000,000,000 BUBS***

## **About the Developers**

***The team behind BUBS are a group of dog loving crypto enthusiasts. We work hard to be the better dog token.***
